Project Description

The objective of the proposed advisory project is to support an economic operator in successfully launching its leasing operations in Haiti, and thereby contribute to facilitating increased access to finance for MSMEs. The project will be implemented over a period of three years and a quarter and build upon the results of the Haiti leasing project (593907). It will support the economic operator in implementing its business plan, providing assistance according to the following components:

Component 1. Design and structure an IFC-client partnership to deliver leasing advisory services
Component 2. Set up of the clients organizational structure, products, systems and procedures
Component 3. Development of the client's staff internal capacity to launch and operationalize leasing activities
Component 4. Progress monitoring and supervision

By completion of this project, it is expected that the economic operator will be fully operational. The value of leases granted by the economic operator will have reached US$ 15 million.
