## Project Description

Building on the success of IFC's support to develop and implement the Building Energy Efficiency Code QCVN 09:2013/BXD (the Code), in late 2016, the Ministry of Construction of Vietnam requested IFC to upgrade and further assist implementation of the Code. The project will examine green building value chain, major stakeholders and overall requirements for green buildings construction in Vietnam. Moreover, a programmatic approach to combine mandatory regulations and voluntary certification will be undertaken to address major barriers in promoting green building practices in Vietnam.

---

### People Affected By This Project

The project will contribute to GHG emission reductions targeted by the Government of Vietnam through broad implementation of green building measures, including mandatory policies , voluntary certification and integration of green building education to enhance sustainable building practices.

---

## Investment Description

- International Finance Corporation (IFC)

## Contact Information

\*There is no project contact information available by this stage of the project\*

### ACCOUNTABILITY MECHANISM OF IFC

The Compliance Advisor Ombudsman (CAO) is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an IFC or MIGA- financed project. If you submit a complaint to the CAO, they may assist you in resolving a dispute with the company and/or investigate to assess whether the IFC is following its own policies and procedures for preventing harm to people or the environment. If you want to submit a complaint electronically, you can email the CAO at [CAO@worldbankgroup.org](mailto:CAO@worldbankgroup.org). You can learn more about the CAO and how to file a complaint at <http://www.cao-ombudsman.org/>
