AP Platform

Quick Facts

Financial Institutions	International Finance Corporation (IFC)
Status	Approved
Bank Risk Rating	U
Voting Date	2017-05-15
Investment Type(s)	Advisory Services
Project Cost (USD)	$ 933.50 million

Project Description

Main objectives of the Animal Protein Platform will be to help identify and scope opportunities for advisory projects and provide a better understanding of the developmental opportunities with new clients. It will also be a repository of knowledge and a tool to raise IFC profile as a prime provider of advisory services in the sector. The goal of the Platform would be to define a range of standard client issues and, with time, develop a tested toolbox of solutions, and a trusted network of external experts that can work alongside IFC staff to deliver quality service to clients.

People Affected By This Project

The Program will cover advisory services and business development activities with MAS clients in the animal protein space - poultry, dairy, pork, beef and fisheries. Its main goal is to strengthen prospective and portfolio clients' operations and environmental/social performance. It will aim to grow IFC ability to deliver in challenging environments and with unsophisticated sponsors.

ACCOUNTABILITY MECHANISM OF IFC

The Compliance Advisor Ombudsman (CAO) is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an IFC or MIGA- financed project. If you submit a complaint to the CAO, they may assist you in resolving a dispute with the company and/or investigate to assess whether the IFC is following its own policies and procedures for preventing harm to people or the environment. If you want to submit a complaint electronically, you can email the CAO at CAO@worldbankgroup.org. You can learn more about the CAO and how to file a complaint at http://www.cao-ombudsman.org/
