Project Description

The SMEV GPI project will support the GP by providing resources and expertise to build capacities in fund management, team management, value creation, and exit preparedness. The SMEV advisory team will accomplish this project through two different components: fund manager capacity building and GP portfolio SMEs capacity building. The project will reinforce the core foundation skills and knowledge a GP should build from the beginning of its fund life and apply during the investment period. It will also support GPs to create a realistic and actionable approach to pipeline analysis and portfolio management.

People Affected By This Project

The SMEV GPI project is expected to achieve development impact for GPs operating in FCS, IDA, and frontier markets through enhanced access for their SME investments to risk capital, operational improvements, growth in revenues and profitability, and improved governance and E&S standards. IFC's advisory engagement will focus on improving the fund manager's operations, systems, and investment acumen by leveraging expertise and support on GP operations, suitable back-office systems, team capacity building, deal due diligence and structuring, portfolio performance, value addition, and exit strategies. The impact will be measured as the number of SMEs with revenue growth 5% above nominal GDP and number of SMEs reporting improved performance by exit.
