## Project Description

According to the IFC, the goal of this project is to enhance the efficiency of the upstream and downstream supply chain of ETG in Zambia and improve: (i) its access to key target crops such as maize and soybean (others may be added) and (ii) its input sales. This will be done by enhancing the in-house trainer capacity of ETG who will then build the capacity of select intermediaries which support ETG's inputs distribution system and/or manage crop aggregation for ETG.
