<b>Investment Type(s)</b>	Advisory Services
<b>Investment Amount (USD)</b>	\$ 1.60 million
<b>Project Cost (USD)</b>	\$ 1.60 million

## Project Description

As stated by the IFC, the Government of Timor-Leste (GoTL) is currently evaluating the development of a carbon capture storage (CCS) hub facility at the depleting Bayu-Undan reservoir, a mature gas and condensate field located in the Timor Sea which has been in production since 2004.

The Bayu-Undan reservoir has the potential to safely and permanently store approximately ten million tons per annum of CO<sub>2</sub>, as estimated by the current operator. The proposed Bayu-Undan CCS reflects GoTL's commitment towards accelerating decarbonization and meeting the Paris Agreement commitments.

In response to GoTL's request, IFC, with cross support from the World Bank, will provide assistance by conducting assessments on legal and regulatory issues and best practices, knowledge sharing and potential fiscal benefit sharing and local participation opportunities through engagement on 4 key components:

1. CCS Knowledge Sharing – Through knowledge reports and workshops, IFC will provide the GoTL with a better understanding of CCS by covering topics such as: CCS technology and project developments; CCS policy, legal and regulatory developments; and CCS economics, carbon markets, business cases, and commercial arrangements;
2. CCS Legal and Regulatory Mapping – IFC will review of the current relevant legislation and regulation in Timor-Leste against international CCS legal and regulatory best practice, international conventions, obligations, and applicable carbon markets and present framework options to assist GoTL.
3. CO<sub>2</sub> Storage Hub assessment and Carbon Markets – IFC will conduct a market assessment for future international CO<sub>2</sub> trade in the Asia Pacific region to understand the potential and competitive positioning of the Bayu-Undan CCS project to become a regional CO<sub>2</sub> storage hub.
4. CCS Fiscal and Benefit Sharing Planning – IFC shall review existing license/production sharing frameworks and fiscal frameworks which could be applied to the CO<sub>2</sub> storage project, to maximize revenues to the country.

## Contact Information

*No project contacts provided at the time of disclosure.*

## ACCESS TO INFORMATION

You can submit a request for information disclosure at: <https://disclosures.ifc.org/#/inquiries>

If you believe that your request for information from IFC has been unreasonably denied, or that this Policy has been interpreted incorrectly, you can submit a complaint at the link above to IFC's Access to Information Policy Advisor, who reports directly to IFC's Executive Vice President.

## ACCOUNTABILITY MECHANISM OF IFC/MIGA

The Compliance Advisor Ombudsman (CAO) is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an IFC or MIGA- financed project. If you submit a complaint to the CAO, they may assist you in resolving a dispute with the company and/or investigate to assess whether the IFC is following its own policies and procedures for preventing harm to people or the environment. If you want to submit a complaint electronically, you can email the CAO at [CAO@worldbankgroup.org](mailto:CAO@worldbankgroup.org) You can learn more about the CAO and how to file a complaint at <http://www.cao-ombudsman.org>
