According to bank provided information, IFC will support the Government of Mozambique in conducting detailed studies to determine adequate sites for deploying wind power. The project will aim to identify a longlist of sites, evaluate, and rank them based on pre-agreed criteria which will include integrated technical and E&S criteria. Once a shortlist of sites has been identified, IFC will undertake further assessments of the sites including their commercial feasibility, and should the conclusions and government buy-in prove to be favorable, those sites will advance to full project preparation activities under a new project for a Scaling Wind mandate.
