Project Description

According to the Bank's website, the project will continuously improve IFC's Pillar Business Assessment and Pillar Social Sustainability Assessment housing tools and each tool's capacity-building curriculum, based on feedback from internal and external stakeholders. This project will implement short-term client-facing advisory in the form of deployment of the Pillar assessment tools and targeted capacity building. The project will also include knowledge management and market analysis activities.

Pillar 2.0 is the natural follow on from Global Housing Advisory Platform 606021 (effectively Pillar 1.0). This project will continue the work of phase 1 and will support the scale up of the Pillar housing advisory offering around ongoing evolution of the tools, to increase the proficiency of affordable housing developers in key markets where there is lack of affordable and socially sustainable housing. Capacity gaps of housing developers will be identified and addressed to enable them to create more sustainable and bankable projects that are aligned with international good practices.
