## Project Description

According to the Bank's website, by digitizing and including rural farmers in the financial ecosystem, this project can enable greater access to a range of financial services, beginning with payments but eventually moving into credit, insurance and others. Kifiya is one of the leading agtechs in the country, which aims to digitize one million farmers and leverage an agent network for cash-in/cash out.

The project will be implemented through the following components:

- Component 1: Last-Mile Distribution/Enhancing Agent Networks.
- Component 2: Onboarding SHFs/Customers Acquisition.

The objective of this project is to increase access to digital financial services for SHFs in Ethiopia. This will be achieved by (i) strengthening the quality and quantity of Cash in/Cash out (CICO) agents; and (ii) digitally mapping and profiling one million farmers in key regions across the country.
