Project Description

The project consists of the operation and upgrade, reactivation and expansion of Myanmar Post and Telecommunication's (MPT) network in Myanmar. MPT is the government run network operator and provider of telecommunication services in Myanmar, and operates both fixed line and wireless networks. KDDI Summit Global Myanmar Co. Ltd, (KSGM), a joint venture between Sumitomo Corporation (SC) and KDDI Corporation has entered into a 'Joint Operation Agreement' (JOA) with MPT to implement, upgrade and expand the national telecommunications service (including mobile, fixed, internet, etc.). Sumitomo Corporation (SC) has requested that MIGA provide a guarantee for its equity and shareholder loan investment into KSGM. Together, KSGM and MPT are referred to as the 'Joint Operation' (JO). The JO has approximately 2,000 operational telecommunications towers as of June 2015, some of which will be upgraded or decommissioned and replaced, and plans to construct a further approximately 5,000 towers to meet a target of providing coverage to 70% of the geographical area of Myanmar by the end of March 2016

As land will be acquired through negotiated lease agreements, PS 5 does not technically apply. However, as the roll-out moves into rural areas, tower sites may be officially owned by the government or another private land owner, but traditionally used by local people, and therefore PS has been applied to this project. The project 'Site Acquisition Procedures,' were reviewed and found to be consistent with the requirements of PS 5.
