Project Description

On December 14, 2018, MIGA agreed to issue guarantees of up to US\$1,500 million, for up to seven years, covering the risk of expropriation of Banco Santander Chile's mandatory reserves held at the Central Bank of Chile.

MIGA analyzed the portfolio of Santander Chile for types of transactions, tenor, size, industry sectors, and exposure to MIGA's Exclusion List. As of June 2018, long term corporate finance accounts for approximately 23% of the bank's total portfolio. Corporate and project finance transactions include among others exposure to potentially high-risk environmental and social sectors such as mining, utilities (water, gas, electricity), manufacturing and chemicals. The main environmental and social (E&S) risks of this project are associated with the bank's lending activities in high-risk sectors and its capacity to manage these risks. The applicable environmental and social requirements are MIGA's Exclusion List; applicable national environmental and social laws and regulations; and MIGA's Performance Standards.
