Project Description

On a consolidated level, the MIGA guarantee is expected to provide regulatory capital relief to NLB by reducing the amount of Risk-Weighted Assets (RWAs). The guarantee is expected to last up to seven years. NLB is Slovenia's largest banking and financial services company, with operations throughout the region. Outside of Slovenia, NLB's banking subsidiaries must maintain mandatory reserves at their respective central banks based on the volume of customer deposits. Mandatory reserves have an impact on NLB's consolidated RWAs, resulting in less headroom for other assets at a given capital level.

Financial Intermediary

Financial Intermediary: A commercial bank or financial institution that receives funds from a development bank. A financial intermediary then lends these funds to their clients (private actors) in the form of loans, bonds, guarantees and equity shares. Financial intermediaries include insurance, pension and equity funds. The direct financial relationship is between the development bank and the financial intermediary.

Private Actors Description

According to MIGA, NLB is the largest banking and financial services group in Slovenia with operations across southeastern Europe. NLB's banking subsidiaries outside of Slovenia are required to maintain mandatory reserves at their respective central banks based on the volume of customer deposits. Mandatory reserves affect NLB's overall RWAs at the consolidated level, resulting in less headroom for other assets at a given level of capital.
