MIGA's NHFO-SOE instrument is enabling Crédit Agricole CIB to extend a long-term loan that will be used to support CODELCO's payment obligations under five renewable energy power purchase agreements (PPAs) with third-party private producers that supply electricity to CODELCO (the Project).

## Early Warning System Project Analysis

The Project is considered Category B under MIGA's Policy on E&S Sustainability (2013), as it considered to entail business activities with potential limited adverse environmental or social risks and/or impacts that are few in number, generally site-specific, largely reversible, and readily addressed through mitigation measures.

The risks associated with the Project relate to CODELCO's institutional capacity to effectively implement its corporate environmental and social management system in accordance with MIGA E&S Performance Standards (PSs), in the context of Project.
