MIGA-5912

Mehr Petrochemical Company (JV)

Quick Facts

Countries	Iran
Specific Location	South Pars
Financial Institutions	Multilateral Investment Guarantee Agency (MIGA)
Status	Closed
Bank Risk Rating	A
Voting Date	2006-01-01
Borrower	Cementhai Chemicals Co., Ltd.
Sectors	Energy, Industry and Trade
Investment Type(s)	Guarantee
Investment Amount (USD)	\$ 122.20 million

Project Description

In December 2015, MIGA issued \$122.2 million in guarantee coverage for a joint venture petrochemical project, its first coverage ever for a project in Iran. The guarantees cover investments by Cemen Thai Chemicals Co., Ltd and National Petrochemical Public Company Limited, both of Thailand, and Itochu Corporation of Japan, totaling \$27.1 million, \$7.1 million, and \$8.6 million, respectively. The guarantees also cover a \$96 million shareholder loan from Itochu to the project enterprise, Mehr Petrochemical Company (JV)¹. Coverage is for 15 years against the risk of breach of contract for both the equity and the shareholder loan investments. MIGA is also covering Cemen Thai Chemicals and NPCT against the risk of war and civil disturbance. MIGA's guarantee to Itochu complements a political risk guarantee provided by Japan's national insurer, NEXI.

Iran holds the second largest natural gas reserve in the world, at roughly 15 percent. In an effort to diversify the country's exports away from oil, the Iranian government is developing the South Pars gas field, a giant offshore gas reserve in the Persian Gulf. The gas will be processed at a nearby gas separation complex located in the Pars Special Economic/Energy Zone--established to develop gas, petrochemicals, and other related industries--which will provide a cost-effective supply for the production of polyolefins.

Polyolefins, including high-density polyethylene (HDPE), are low-cost, versatile polymers used in a broad range of applications, from automotive parts to carpets, and from packaging of milk, juice, and laundry detergent to trash bags. Demand for HDPE is on the rise in most parts of the world, particularly in Northeast Asia, where demand is expected to grow by an average of 7 percent a year through 2009. Meanwhile, the Middle East is fast becoming the world's largest exporter, due to the comparatively low cost of producing polyolefins.

The MIGA-guaranteed petrochemical project involves the construction and operation of a high-density polyethylene plant with a capacity of up to 300,000 metric tons per year. The project plans to export the HDPE primarily to China. The plant will occupy 13.1 hectares in the petrochemical development area of the special economic zone. The project will contribute to government revenues through the use of natural gas from the South Pars gas field as the primary source for the feedstock. The project also supports development of the free zone, and ultimately job creation. In addition, the cross-border lending and role of the project sponsors will subject the joint venture to high standards of corporate governance, which is expected to have a strong demonstration effect.

This project is aligned with MIGA's priority of supporting investments among developing countries.

¹As of August 7, 2018, MIGA is no longer covering Itochu's equity and shareholder loans to the project enterprise.

ACCOUNTABILITY MECHANISM OF MIGA

The Compliance Advisor Ombudsman (CAO) is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an IFC or MIGA- financed project. If you submit a complaint to the CAO, they may assist you in resolving a dispute with the company and/or investigate to assess whether the IFC is following its own policies and procedures for preventing harm to people or the environment. If you want to submit a complaint electronically, you can email the CAO at CAO@worldbankgroup.org. You can learn more about the CAO and how to file a complaint at <http://www.cao-ombudsman.org/>
