Project Description

As stated by the NDB, the outcomes of the Project will be improved water ecological environment and flood control capacity in Chongzuo. Project outcomes will be assessed by using the following

indicators: (i) restoration and expansion of urban water area; (ii) improvement of water quality; (iii) increase of urban green space; and (vi) improvement of urban flood protection capacity.

Project outputs will be achieved through successful delivery of Project Components. Project Outputs will include: (i) rehabilitated lakes, rivers, wetlands, channels and their adjacent area; (ii) strengthened water quality and flood monitoring and forecasting capacity; and (iii) enhanced institutional capacity in project planning, design, implementation and evaluation.

The objective of the Project is to improve urban water environment and enhance flood protection through removing urban wastes, connecting water bodies, rehabilitating river and lake embankments, creating vegetated buffer zones in water adjacent area, constructing drainage pumping stations, and establishing a smart water information and management system. The Project has three components: (i) restoration of lakes, rivers, wetlands, channels and their adjacent areas; (ii) development of water ecological environment monitoring, control and management system; (iii) project management support and capacity building.

ACCOUNTABILITY MECHANISM OF NEW DEVELOPMENT BANK

The New Development Bank (NDB) does not currently have an independent accountability mechanism to accept complaints related to NDB-financed projects. The Bank does have a whistleblower mechanism that receives complaints about misconduct related to corruption, fraudulent practices and instances of money laundering in projects financed by the NDB and/or against the NDB staff members. To learn more about the whistleblower mechanism and how to file a complaint, access this webpage at: <https://www.ndb.int/about-us/whistleblowing/>.
