## Project Description

As stated on the project disclosure page, NDB's loan will provide longer-term funding to SFL to support and expand SFL's lending for acquisition of low emitting and energy efficient sustainable vehicles for individual driver turned owners, first time borrowers, micro, small and medium-sized enterprises (MSMEs) including small road transport operators (SRTOs) having 4-5 vehicles engaged in transport and logistics in India.

The Project will contribute to creating sustainable transport infrastructure, pollution reduction and decrease of greenhouse gas ("GHG") emissions in the country by increasing financing available for low carbon commercial vehicles.

NDB funds will be used to finance commercial vehicles based on agreed eligibility criteria in terms of composition of vehicles based on fuel such as CNG/LNG/EV/BS-VI. The eligibility criteria also include state specific utilization for greater impact in low-income states and industrialised states based on need to create sustainable transport infrastructure and reduce pollution. The project will be implemented over a period of 18 months.
