Water and Wastewater Services Expansion Project in Manaus

Project Description

As stated by the NDB, the Project comprises the following components: 1. Expansion and improvements in the water infrastructure; 2. Expansion and improvements in the wastewater infrastructure; 3. Loss reduction; and 4. Operational efficiency, security, and other investments.

The Project aims at rehabilitating or developing water and wastewater infrastructure in Manaus to guarantee access to reliable and affordable water and wastewater services for the population; improving public health and reducing water-borne diseases; and ensuring compliance with environmental standards.

The key benefits of the Project include: (i) improved quality of water services for the citizens with a greater number of households connected to the water network; (ii) reduction of untreated effluent or improved quality of wastewater discharged into the Amazon River basin; and (iii) improved condition and quality of underground water and soil by connecting more households to the sewage network.
