

 Early Warning System

WB-P000311

Biodiversity Conservation and Management Project

Quick Facts

Countries	Cameroon
Financial Institutions	World Bank (WB)
Status	Closed
Bank Risk Rating	B
Voting Date	1995-03-27
Borrower	Government of Cameroon - Ministry of Environment and Forestry
Sectors	Agriculture and Forestry, Climate and Environment
Investment Type(s)	Grant
Investment Amount (USD)	\$ 6.10 million
Project Cost (USD)	\$ 21.00 million

Project Description

According to the Bank's website, the objective of this project is to consolidate and upgrade the management of protected areas in Cameroon by: (a) providing support to the Government in its efforts to conserve and manage its biological resources; (b) promoting involvement of rural populations in biodiversity conservation; and (c) encouraging sustainable utilization of renewable natural resources and promoting sustainable and environmentally compatible development in regions surrounding the Protected Areas.

Early Warning System Project Analysis

The project was assigned Category B, which was appropriate, and an EA of satisfactory quality was prepared, together with a monitoring plan and cost estimate, implementation of which was mandated in the Grant Agreement . Only minor environmental impacts were expected but the EA also addresses more significant social impacts, including those on traditional forest dwelling people. No resettlement was expected. Unfortunately, the ICR contains no information on how well the EA was implemented and whether any unforeseen impacts arose.
