Daphnia Grazing to Stem Global Warming-Linked Bacterial Toxins in  
Fish Ponds

### Quick Facts

Countries	Serbia
Financial Institutions	World Bank (WB)
Status	Proposed
Bank Risk Rating	U
Borrower	Government of Serbia
Sectors	Agriculture and Forestry
Investment Type(s)	Grant
Investment Amount (USD)	\$ 0.20 million
Project Cost (USD)	\$ 0.20 million

### Project Description

Global warming has increased the levels of toxic bacteria in fish farming ponds, reducing the quality of the fish meat and even making it unfit to sell. A DM grant will help SZTR Sunce develop a small-scale biological method for controlling levels of the toxin. The approach, which uses Daphnia#a small plankton crustacean# would be applicable in any region where water quality restricts fish farming.

### Investment Description

- World Bank (WB)

### Contact Information

#### ACCESS TO INFORMATION

To submit an information request for project information, you will have to create an account to access the Access to Information request form. You can learn more about this process at: <https://www.worldbank.org/en/access-to-information/request-submission>

#### ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing [ipanel@worldbank.org](mailto:ipanel@worldbank.org). Information on how to file a complaint and a complaint request form are available at: <https://www.inspectionpanel.org/how-to-file-complaint>
