Project Description

According to WB website, the objectives of the Center West Regional Development Corridor Project are to improve the transport connectivity within the regions along the Kazakhstan Center West Corridor and strengthen the capacity of selected agencies for the effective implementation of the corridor development, and road asset preservation policies. There are five components to the project:

Component 1: Infrastructure development and supervision. The component will be implemented by the CR of the MoID. It will finance civil works on about 1,014 km of road sections between Astana and Shalkar and consulting services for supervision of civil works.
Component 2: Corridor development. This component is at the core of the MoID strategy to foster regional economic development. The component will be monitored by the relative departments of the MoID with the assistance from the CR, KAZ, local authorities (akimats), and consultants hired under the project.
Component 3: Operation and maintenance. This component will allow the MoID to implement the sector strategy designed with the assistance of the Bank during the preparation of the road sector reform in 2012–2013. The project will finance facilities and equipment for O&M. The location of facilities is identified by the feasibility study, as well as the type of equipment for routine maintenance.
Component 4: Road safety. The objective of this component is to help the Kazakhstani authorities to develop the RSP, strengthen institutional capacity in relation to the RSP implementation, and increase road safety awareness.
Component 5: Project management
