Project Description

According to bank documents, the project road consists of a 688 km section of road from Karagandy to Burylbaital, an essential link in the corridor between Almaty and Astana. The corridor will provide an all-weather divided highway connecting Kazakhstan toWestern China and Russia. It will be constructed along the existing road alignment, and will accommodate a duplicated carriageway, i.e., the new road will improve the existing 2-lane single carriageway road to 4-lane dual carriageway road and consist of 4 x 3.75m lanes, 3.75m shoulders, and a 3 to 6m median strip. It will be designed for a traffic speed of 120 kilometres / hour (km/hr) and axle loads up to 13 tonnes. Bridges, overpasses, and pedestrian and animal passes will be included where required and informed by social impact assessments. The proposed development objective is to make safe and sustainable improvements to transport and freight connectivity between Almaty and Astana, and improve access to economic opportunities.
