Kenya Climate Smart Agriculture Project

### Quick Facts

Countries	Kenya
Financial Institutions	World Bank (WB)
Status	Active
Bank Risk Rating	B
Voting Date	2017-02-09
Borrower	GOVERNMENT OF THE REPUBLIC OF KENYA
Sectors	Agriculture and Forestry
Investment Amount (USD)	\$ 250.00 million
Project Cost (USD)	\$ 279.70 million

### Project Description

The objective of the Climate Smart Agriculture Project for Kenya is to increase agricultural productivity and build resilience to climate change risks in the targeted smallholder farming and pastoral communities in Kenya, and in the event of an Eligible Crisis or Emergency, to provide immediate and effective response. The first component is upscaling climate smart agricultural practices. This component will finance interventions that promote and facilitate the adoption of TIMPs to achieve the CSA triple-wins of increased productivity, enhanced resilience (adaptation), and reduced GHG emissions (mitigation) per unit of output (as co-benefits). The second component is the strengthening climate-smart agricultural research and seed systems. This component will support the development, validation, and adoption of context specific CSA TIMPS to target beneficiaries under components one and three and also develop sustainable seed production and distribution systems. The third component is the supporting agro-weather, market, climate, and advisory services. This component will finance the development of agro-weather forecasting and marketing information system and their dissemination tools through three subcomponents: improving agrometeorological forecasting and monitoring; using big data to develop a climate-smart, agro weather and market information system and advisories; and building institutional and technical capacity for agro-meteorological observation and forecasting, agricultural statistics collection and analyses, and market advisory services. The fourth component is the project coordination and management. This component will finance activities related to national and county-level project coordination and management, including developing annual work plans and budgets (AWP&Bs).

## ACCOUNTABILITY MECHANISM OF WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing [ipanel@worldbank.org](mailto:ipanel@worldbank.org).

You can learn more about the Inspection Panel and how to file a complaint at:

<http://ewebapps.worldbank.org/apps/ip/Pages/Home.aspx>.
