Project Description

According to the bank, the development objective of the proposed Project is to help confirm resources and speed-up geothermal development in the field by mitigating risks and leveraging funds through a public-private partnership (PPP) arrangement. The proposed Project will initially lead to the construction of a small demonstration power plant that will confirm the operational capability of the geothermal field. By doing so, it will also open up the prospects for the progressive modular expansion of power generation capacity within the field, which is preliminarily estimated at 215 MW.
