Project Description

The objective of the Additional Financing for the Tarbela Fourth Extension Hydropower Project is to facilitate a sustainable expansion of Pakistan’s electricity generation capacity.’ The primary reason for AF of US$390 million for these scale-up activities is to: (i) utilize the experience gained from implementation of T4HP as the WAPDA team (PMU) is already functional and most of the PMU staff in particular environmental and social unit and procurement and financial management unit will be common for both the projects, (ii) address the issues that are common to both T4HP and T5HP more efficiently e.g. the transmission line proposed under AF is not only going to serve T5 but will be providing required contingencies for T4, (iii) have better coordination in dealing with technical and logistical constraints associated with simultaneous implementation of T4HP and T5HP, (iv) provide flexibility in allocating resources between T4HP and T5HP more efficiently e.g. through AF financial and technical resources would be available to address any unforeseen technical or aftercare issues that may emerge post commissioning of T4HP. In summary, there are substantial efficiency and procedural gains in doing T5HP through a proposed AF as opposed to a new operation.
