Project Description

The development objective of the Urban Water Supply Project for Mali is to increase access to sustainable water services in Bamako. The additional financing (AF) will finance activities to maximize the development impact of the original project by: (a) constructing water production, storage, and pumping facilities and primary distribution networks to improve the delivery of water in urban centers where the quality of services has deteriorated; and (b) providing access to water services through social water connections and stand posts in unserved areas. The changes associated with the AF and project restructuring comprise modifications to the original: (a) project development objective (PDO) formulation; (b) scope of activities; (c) results framework; (d) closing date; (e) legal name of the project; and (f) safeguard policies triggered.
