Project Description

From World Bank:

SEMCAR's overall objective is to improve economic management, regional integration and competitiveness in up to 12 Caribbean countries through more efficient, effective and accountable public institutions, policies, processes and ICT systems. This is being achieved through the provision of policy advice, technical assistance and selected ICT investments. The Project Development Objective (PDO) of the proposed operation is to strengthen and modernize selected ICT systems in Tax, Customs, and Public Financial Management used by targeted institutions in Antigua and Barbuda, Belize, Dominica, Grenada, St. Kitts and Nevis, St. Lucia, and St. Vincent and the Grenadines. The proposed operation is expected to contribute to SEMCAR's key results through: (i) improved revenue collection due to more efficient processing and clearance procedures, (ii) enhanced investment climate and economic development due to efficiency gains, and (iii) greater access to crucial information that will allow for the formulation of more sound macroeconomic and fiscal policies. Therefore, the ICT investments aimed for under the project will enable the Recipients to institutionalize and operationalize key policies and processes developed under SEMCAR, and thereby contribute to improved economic management in the region.
