## **Project Description**

The objective of this operation is to help the Government introduce growth-enabling reforms in the financial sector, business environment, and infrastructure; generate fiscal resources and savings; and improve quality of expenditures. A key focus of government policy is to reduce the dependence on government spending and facilitate the development of alternative growth drivers. This operation will help facilitate this shift by supporting policies that are aimed to address the risks to growth both directly and indirectly. The first pillar of the operation focuses on policies aimed to deal with direct risks to growth such as inadequate frameworks for credit operations and unreliable energy supply.
