## Early Warning System

Niger Solar Electricity Access Project (NESAP)

### **Quick Facts**

Countries	Niger
Financial Institutions	World Bank (WB)
Status	Active
Bank Risk Rating	В
Voting Date	2017-06-07
Borrower	Government of Niger
Sectors	Energy
Investment Amount (USD)	\$ 49.89 million
Project Cost (USD)	\$ 49.89 million

### **Project Description**

The development objective of the Solar Electricity Access Project is to increase access to electricity through solar energy in rural and peri-urban areas of the Republic of Niger. This project has four components. 1) The first component, Market Development of Stand-alone Solar Systems, aims to develop a sustainable market for high quality standalone solar systems by increasing access to commercial financing to solar energy companies and their clients, namely households and farmers. 2) The second component, Rural Electrification through Service-based Solar Hybrid Mini-grids, to be implemented by Nigerien Agency for the Promotion of Rural Electrification (ANPER) aims to subsidize the provision of electricity to rural localities outside the national utility concession area that are not expected to be reached by the national grid in the short-term but have large populations, high density, power demand, and considerable economic and social activity. 3) The third component, Solar Photovoltaic (PV) Hybridization of Isolated Thermal Mini-grids and Expansion of Access, to be implemented by Nigerien Electricity Society (NIGELEC) will finance the hybridization of several existing diesel-based, isolated grids with solar PV generation and battery storage in rural areas, and will be managed by NIGELEC to increase the hours of operation of the isolated systems and/or to decrease diesel consumption. 4) The fourth component, Implementation Support and Technical Assistance, aims to support project management and implementation, capacity building, and Technical Assistance (TA) to key off-grid electrification sector stakeholders, as well as monitoring and evaluation (M and E)

#### ACCOUNTABILITY MECHANISM OF WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. You can learn more about the Inspection Panel and how to file a complaint at:

http://ewebapps.worldbank.org/apps/ip/Pages/Home.aspx.
