Project Description

The development objective of the Agro-Pastoral Productivity and Markets Development Project for Burundi is to increase small producers' productivity and market access for targeted commodities in the project Area. The proposed additional financing does not entail any change in the project development objective, description, or safeguard category. The AF will complete, consolidate and expand project activities. The project comprises two components. The first component, support to agricultural productivity and access to markets" will up-scale activities related to the promotion and adoption of improved technology packages by beneficiaries through the implementation of productive sub-projects. The focus will be on post-harvest technology, climate-resilient technologies and nutritionally-enhanced crops based on the demand-driven approach pioneered under the initial Projet de Productivité et de Développement des Marchés Agricoles (PRODEMA) ; The second component, irrigation development and feeder road rehabilitation" will be expanded to accommodate activities related to: (i) completing and consolidating rural infrastructure rehabilitation work, and (ii) further developing rural infrastructure to increase productivity and facilitate access to markets.
