Project Description

The project aims to support the Government of the Republic of Indonesia’s priorities for improving quality of spending, strengthening revenue administration and enhancing tax policy to further the country’s medium-term economic development and poverty reduction goals. The operation is the second in a programmatic series of now three single-tranche operations supporting critical policy and institutional reforms with three development objectives: a) improving composition of spending, budget execution rates and efficiency of spending; b) increasing tax administration efficiency and compliance and audit capability; and c) increasing revenue potential and economic efficiency of tax policy. A third single tranche operation is proposed, with the same development objectives. The third operation responds to a direct request from the government to support the acceleration of fiscal reform efforts in 2017.

The project is being closed on June 30th, 2018
