### **Project Description**

In 2013, the Organization for Economic Co-operation and Development (OECD) and WTO released a new database on Trade in Value-Added (TiVA). However, to date, of the 61 economies covered in the database, only two (Tunisia and South Africa) are from the African continent. The overall objective of the project is to improve the capacities of selected African countries to produce supply and use tables compliant with the needs of the TiVA-WTO database.
