BO Wastewater Treatment and Reuse

Early Warning System

BO Wastewater Treatment and Reuse

WB-P162305

Quick Facts

Countries	Bolivia
Financial Institutions	World Bank (WB)
Status	Proposed
Bank Risk Rating	A
Borrower	Plurinational State of Bolivia
Sectors	Water and Sanitation
Investment Type(s)	Loan
Investment Amount (USD)	$ 140.00 million
Loan Amount (USD)	$ 140.00 million
Project Cost (USD)	$ 150.00 million

Project Description

According to bank documents, the project aims to reduce wastewater pollution and strengthen the capacity of the participating institutions to manage wastewater treatment systems in La Paz and Tarija. It will increase wastewater treatment and reuse coverage rates so as to ultimately reduce water pollution, improve the health of populations in beneficiary areas, and contribute to building climate resilience in agricultural areas surrounding urban cities. An initial Climate Risk screening showed moderate risks for wastewater in the country; these risks are mainly linked to increased incidence of drought which will affect both the quality and quantity of wastewater to be treated.

Investment Description

- World Bank (WB)
