### Project Description

The development objectives of First Economic Recovery and Resilience Development Policy Operation Project for Chad and pillars are to (1) enhance fiscal risk management; (2) improve oil revenue transparency and management; (3) promote resilience and economic diversification in key real sectors; and (4) increase social protection for the poor and vulnerable. The series has been designed to leverage and complement ongoing and planned World Bank projects and Technical Assistance (TA) activities across the four pillars, in the areas of resources mobilization and State-owned Enterprise (SOE) management, agriculture, and social protection. This programmatic series will also help catalyze private investment through improving the investment climate and creating opportunities in key sectors of the economy. With the support of this operation, the government intends to promote the transparency and effectiveness of its fiscal policy through the establishment of a functional oil revenue management mechanism.
