Project Description

According to bank documents, the objective of the project is to enhance the institutional performance of participating urban local governments to develop and sustain urban infrastructure, services, and local economic development. The proposed Urban Institutional and Infrastructure Development Program (UIIDP or Operation) will support the objectives of the WB's Ethiopia Country Partnership Framework (CPF) (2018–22). The CPF for Ethiopia, discussed by the Board on June 27, 2017, has three strategic focus areas: (a) promoting structural and economic transformation through increased productivity, (b) building resilience and inclusiveness, and (c) supporting institutional accountability and confronting corruption. The proposed UIIDP supports all three focus areas.

The UIIDP's fundamental objectives and funding directly target the strengthening of urban governance and management systems, participatory strategic and spatial planning, improved transparency and accountability enhanced citizen engagement in decision-making of urban governments (including of women), public private dialogue, and directly financing urban infrastructure and services. By assisting to create well-functioning and productive urban centers, the UIIDP contributes to the WB's twin goals of ending extreme poverty and boosting shared prosperity.The proposed Operation will be financed through a hybrid of Investment Project Financing (IPF) and Program-for-Results (PforR) instruments. Most of the Operation is financed through the PforR instrument, which has proven to be the optimal and effective mechanism for providing conditional grants to regional states and ULGs, as demonstrated in the ULGDP II.
