Project Description

The development objective of Erosion and Watershed Management Project for Nigeria is to reduce vulnerability to soil erosion in targeted sub-watersheds. This project requires additional financing to scale up successful gully restoration and watershed management activities and add new activities that have emerged from implementation experience, global commitments, and country initiatives. It also requires changes in the results framework and the triggering of safeguard policies as a result of the Additional Finance (AF). The project will be extended by one year and the closing date of the project is extended to June 30, 2021.
