Project Description

The project objective is to improve resilience among the poor and vulnerable population and strengthen the national platform for safety nets.

The proposed five-year project will support the MNSSP II as the overarching and formal platform in social protection, led by Government with coordinated donor engagement. The proposed PNSSP project is entirely devised around the MNSSP II Strategy and Implementation Plan, reflecting strong Government ownership. In this context, the project will contribute to the MNSSP II in two ways, as reflected in the PDO. The first part of the PDO highlights the importance of improving resilience, which is understood as the ability of households to improve initial levels of welfare in the face of chronic stress and to maintain welfare in the face of shocks. In this regard the project emphasizes safety net programs which boost economic and social inclusion. The resilience of these programs will be further strengthened by the delivery systems and capacity investments under the project. The second part of the PDO highlights the need to more strongly support the effectiveness of a national system for social safety nets under the MNSSP II framework. The project places emphasis on this through efforts to support delivery systems (for social registry, e-payments and citizens engagement), as well as efforts to strengthen overall capacity and harmonization in the sector. The project is based on a strong vision of reform, working towards a Government led platform with improved donor coordination. In this respect, there is widespread recognition on the need for improved donor harmonization and coherence.
