Central Sulawesi Rehabilitation and Reconstruction Project

Quick Facts

Countries	Indonesia
Specific Location	Central Sulawesi
Financial Institutions	World Bank (WB)
Status	Proposed
Bank Risk Rating	A
Borrower	The Government of the Republic of Indonesia
Sectors	Construction, Infrastructure
Investment Type(s)	Loan
Investment Amount (USD)	\$ 256.20 million
Loan Amount (USD)	\$ 256.20 million
Project Cost (USD)	\$ 256.20 million

Early Warning System Central Sulawesi Rehabilitation and Reconstruction Project

WB-P169403

Project Description

According to the bank document, the project aims to reconstruct and strengthen public facilities and safer housing in selected disaster-affected areas. The project consists of 3 components:

Component 1. Resilient reconstruction and strengthening of public facilities. This component will finance civil works for rehabilitation, reconstruction and structural strengthening of public facilities to improve seismic performance and safety, reduce disaster vulnerability, increase climate resilience, and improve functionality and service standards. Public facilities such as schools, health facilities, markets, and government offices are eligible for financing under this component.

Component 2. Resilient construction of permanent housing units and settlement infrastructure. This component will finance civil works for construction of up to 15,000 permanent core housing units to the project's resilience standards in safe resettlement sites and related settlement infrastructure and community facilities to relocate disaster-displaced households. Affected communities will be engaged from the beginning of the relocation process with special emphasis on the participation of women and vulnerable community members. This component will also support communities in the reconstruction of homes that meet seismic risk mitigation standards in safer locations.

Component 3. Project implementation support. This component will finance the costs of expert consultants and community facilitators throughout the project cycle to strengthen the Government's capacity—at both the central and subnational level—on post-disaster recovery. It could also include the development of Standard Operating Procedures (SOPs), technical guidelines, and operational manuals.

ACCOUNTABILITY MECHANISM OF WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. You can learn more about the Inspection Panel and how to file a complaint at:

http://ewebapps.worldbank.org/apps/ip/Pages/Home.aspx.
