Voting Date	2020-05-13
Borrower	Government of Angola
Sectors	Law and Government
Investment Type(s)	Loan
Investment Amount (USD)	\$ 250.00 million
Project Cost (USD)	\$ 250.00 million

Project Description

According to bank documents, the proposed project objective is to strengthen the institutional capacity, resource management, and accountability of local governments to improve the delivery of services.

The project has three components:

1. **Reinforcing the financial capability of autarquias to invest in social services and local development.** This component aims at improving the performance of autarquias in managing service delivery through: enhancing the organizational structure of autarquias; building the capacity of their public servants; improving financial viability of autarquias; boosting transparency, accountability, and participation at the local level, so as to create the conditions necessary for more effective municipal-level delivery of public services; and strengthening the central government-level's governance, PFM, and fiscal framework supporting decentralized delivery of services.
 - I. Sub-component 1.1: Improving central government policy and implementation for local service delivery. This sub-component focuses on restructuring and strengthening the capacity of central government entities to strategically manage, coordinate, monitor, and evaluate the implementation of decentralization.
 - II. Subcomponent 1.2: Improving financial management capacity, performance and accountability of local government for service delivery.
2. **Strengthening Identity Management.** This component aims to increase the number of Angolans with legal identity, thus helping ensure greater access to administrative and public services. This involves revising the institutional and legal framework of the civil registry and national identification systems, simplifying and automating processes, reinforcing the organic link between systems, and building the capacity of autarquias to provide deconcentrated identity management services. The end goal is to develop capacities of the GoA to provide secure and trustworthy identification credentials, particularly to the most vulnerable populations (including women), aligned with the ten Principles on Identification for Sustainable Development.²³ To pursue this objective the component envisages a two-tier approach, in line with best practices from the Identification for Development (ID4D) initiative:
 - I. Subcomponent 2.1: Modernizing Identity Management Systems and Processes. This subcomponent focuses on simplifying and rationalizing Angola's civil registry and identification systems.
 - II. Subcomponent 2.2: Boosting CVRS Services at the Municipal Level 61. This subcomponent focuses on boosting the capacity of autarquias to provide civil registration and BI services through BUAPs.
3. **Project Management.** This component aims to support capacity building and institutional strengthening related to achievement of key results while also providing just in time funds for future priorities. Activities supported under this subcomponent include: (i) support for overall project coordination, including operating and human resources costs; (ii) support to Steering Committee and Operational Technical Committee; (iii) technical assistance to support project management and implementation (including project M&E, set-up of an environment and social management arrangements, change management and ICT); (iv) just-in-time technical assistance allocation to respond to emerging needs during project implementation; and (v) recruitment of Independent Verification Agency for the verification of Project DLIs and annual financial audit of the Project. Resources will also be used to support communication and dissemination activities, including workshops and communication through different media. The key result of this component is enhanced capacity for project management and institutional coordination to achieve project results.

ACCOUNTABILITY MECHANISM OF WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. You can learn more about the Inspection Panel and how to file a complaint at: <http://ewebapps.worldbank.org/apps/ip/Pages/Home.aspx>.
