Sectors	Education and Health
Investment Type(s)	Loan
Investment Amount (USD)	$ 141.10 million
Project Cost (USD)	$ 200.00 million

Project Description

According to bank documents, the project objective is to support the Government of Jordan in maintaining the delivery of primary and secondary health services to poor uninsured Jordanians and Syrian refugees at Ministry of Health facilities.

The project has two components:

1. Component 1 (US$190 million) will reimburse the GOJ through results-based financing for health services provided to Syrian refugees, poor and uninsured Jordanians at primary and secondary MOH health care facilities nationwide. The services covered are based on the country's identified package of primary and secondary health care inpatient and outpatient services. The disbursements are based on a verification of: (i) the number of health services provided to the project beneficiaries verified by a UVE; and (ii) the expenditures incurred by the GOJ to deliver these services verified by the Audit Bureau (AB) of Jordan.
2. Component 2 (US$10 million). The bulk of the financing of this component is proposed to be disbursed using DLIs (nonscalable) focusing on providing financial resources and incentives to the MoH to improve coverage and quality of care of PHC services. A smaller amount of money will finance management of the project and other key consultancies to provide technical assistance to enhance sustainability of UHC.
    i. Sub-component 2.1. (US$9 million) Improving coverage and quality of primary health care. This sub-component aims to strengthen PHC services by expanding the introduction of a Family Health model, with emphasis on human resource development.
    ii. Component 2.2 (US$1 million) TA to improve MOH capacity for sustainable UHC. This sub-component will finance TA activities to improve performance and management of the public health system including: health information systems to track services delivered to target populations, human resources for health, health insurance financing (balancing revenues and expenditures to improve sustainability) and strategic purchasing for services in the private sector. The
    sub-component would finance activities to increase MOH capacity to: (i) maintain a grievance redress mechanism (GRM); and (ii) raise awareness on gender-based violence (GBV) issues through awareness sessions and development of promotional materials (i.e. short video clips and pamphlets).

ACCOUNTABILITY MECHANISM OF WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. You can learn more about the Inspection Panel and how to file a complaint at: http://ewebapps.worldbank.org/apps/ip/Pages/Home.aspx.
