WB-P171040

Mozambique: Cyclone Idai & Kenneth Emergency Recovery and Resilience Project

Quick Facts

Countries	Mozambique
Specific Location	Sofala and Cabo Delgado provinces
Financial Institutions	World Bank (WB)
Status	Proposed
Bank Risk Rating	A
Voting Date	2019-09-30
Borrower	Government of Mozambique
Sectors	Humanitarian Response, Law and Government
Investment Type(s)	Grant
Investment Amount (USD)	$ 130.00 million
Project Cost (USD)	$ 210.00 million

Project Description

According to bank documents, the project objective is to support the recovery of public and private infrastructure and livelihoods while strengthening climate resilience in the areas most affected by Cyclones Idai and Kenneth.

The project will address recovery needs in the coastal provinces most affected by Cyclone Idai and Kenneth, and will support climate resilience investments in the city of Beira. The coastal provinces of Sofala and Cabo Delgado have borne the brunt of Cyclone Idai and Kenneth; thus, the project will prioritize recovery of housing and public and climate resilience infrastructure across these two provinces. The project has four components:

1. Recovery and reconstruction of cyclone-affected areas (US$80 million IDA). The activities to be financed under this component include (1) the repair and reconstruction of housing for selected vulnerable communities; (2) the repair and reconstruction of key public infrastructure; (3) the recovery of the private sector and economic activities.
2. Building Climate Resilience (US$63 million IDA plus US$60 million co-financing from DRIVE Program). The proposed project presents a holistic and strategic approach to reconstruction aimed at reducing the vulnerability of the city of Beira, an important economic hub that suffered large losses due to cyclone Idai, tom climate-related hazards. Building on existing Bank engagements in climate change adaptation in Beira through the Cities and Climate Change Project (P123201), this component will strengthen the resilience of the city of Beira to future climate hazards, by (1) repairing and significantly strengthening coastal protection; and (2) expanding the rehabilitated drainage system to reduce flooding in vulnerable parts of the city.
3. Project Implementation, Monitoring and Evaluation (US$7 million). This Component will support the implementation of all project activities, through establishing and strengthening the capacity of GREPOC and AIAS (responsible for implementing Component 1 and 2, respectively), covering technical, fiduciary, safeguard, project management and citizen engagement capacities.
4. Contingent Emergency Response Component – CERC (US$0 million). This component will provide immediate response to an Eligible Crisis or Emergency, as needed. This would finance emergency works in the case of another disaster event by including a "zero-dollar" Contingency Emergency Response Component (CERC).

ACCOUNTABILITY MECHANISM OF WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. You can learn more about the Inspection Panel and how to file a complaint at: http://ewebapps.worldbank.org/apps/ip/Pages/Home.aspx.
