| Project Cost (USD) | \$ 72.00 million |

Project Description

According to bank documents, the project objective is to address the early and medium-term resilient disaster recovery needs of cyclone-affected people.

The project has three components:

1. Providing Immediate Support for Cyclone Recovery (US\$27 million): This component will provide immediate and integrated livelihoods and healthcare solutions to cyclone-affected people, including: (a) restoring livelihoods through conditional cash transfers to provide food assistance, and through unconditional cash transfers for most vulnerable groups; (b) restoring agricultural crop and livestock production, including distribution of agricultural inputs for small farmer households, and the re-stocking and treatment of livestock and poultry, and; (c) accelerating the revitalization of basic health services, including the provision of a basic package of health services and referral pathways related to Gender-Based Violence (GBV)/Sexual Exploitation and Assault (SEA), and child protection measures. All activities under this component will specifically target women and female-headed households. This component will also finance project management and overheads costs for the above activities, such as needs and beneficiary assessments, preparation of technical designs and technical quality control, etc.
2. Enabling Medium-term Cyclone Recovery and Resilience-building (US\$35 million): This component will support the rehabilitation of critical community infrastructure, such as water and sanitation systems, irrigation networks, community schools, and community roads, as well as community level structural mitigation efforts for risk reduction, such as slope protection and environmental rehabilitation. This component will also finance project management and overhead costs for the above activities, such as needs and beneficiary assessments, preparation of technical designs and technical quality control, etc.
3. Providing Project Management and Technical Assistance (US\$7 million): This component will include:
 - I. Project Management. This will provide project management support for the United Nations Office for Project Services (UNOPS), for overall coordination and oversight functions and for centralized project services, across all components, such as M&E, environmental and social safeguards performance, technical quality assurance, grievance redressal, GBV/SEA and referral and protection systems, and for engaging third party monitoring services for project results validation; and
 - II. Technical Assistance (TA) will include a range of activities that will be progressively determined on a needs basis, to facilitate the strengthened implementation. These could include, but are not necessarily restricted to: (a) supporting community risk assessments, monitoring and preparedness planning; (b) supporting community infrastructure damage assessments; (c) enhancing existing systems for displacement monitoring and targeting, as well as conducting intention surveys for internally displaced persons (IDPs); (d) developing health information and epidemic surveillance systems; and (e) strengthening project strategic communications and citizen engagement.

ACCOUNTABILITY MECHANISM OF WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org.

You can learn more about the Inspection Panel and how to file a complaint at:

<http://ewebapps.worldbank.org/apps/ip/Pages/Home.aspx>.
