Bank Risk Rating	U
Voting Date	2020-06-01
Borrower	Government of Mauritania
Sectors	Communications, Law and Government
Investment Type(s)	Loan
Investment Amount (USD)	\$ 30.00 million
Project Cost (USD)	\$ 30.00 million

Project Description

According to bank documents, the program objective is to support the Government of Mauritania (GoM) in strengthening the business and competition environment while increasing climate resilience and human capital for private sector led growth.

The updated reform framework aims at creating Jobs through Economic Transformation (JET) and builds on strengthening market efficiency and connectivity (Pillars 1 and 2), while increasing climate resilience and human capital for private sector led growth (Pillar 3):

1. Pillar 1 supports reforms in SMEs' business environment. This pillar focuses on strengthening access of economic agents to an efficient and transparent commercial justice system and to reliable information on companies and collateralized assets. These reforms will strengthen the Government's objectives to modernize and diversify the economy, level the playing field among economic agents, reduce time and costs to enforce contracts for SMEs, improve commercial dispute resolution between economic actors, strengthen insolvency regimes, and improve access to credit. Ultimately, this will increase the attractiveness of the country for both national and international investors.
2. Pillar 2 supports reforms of the broadband digital infrastructure. This pillar focuses on removing barriers to investment and competition in the internet broadband market and facilitating equitable access to Information and Communication Technology (ICT) / digital services. It does so through regulatory reforms that: (i) open the internet retail and wholesale market up for competition and new entrants; (ii) promote access to dominant operators' essential infrastructure and reduces the costs for deploying digital infrastructure; and (iii) boosts sustainable financing and more projects in underserved areas, especially rural ones. The goal is for low-cost, high quality, broadly accessible ICT services to boost the overall productivity of the economy, enhance new business opportunities for private sector development, and leverage technology for more efficient and accessible service delivery.
3. Pillar 3 supports reforms to strengthen human capital. The aim is to boost resilience to climatic shocks while improving the quality and demand driven nature of education and skills development. On one hand, reforms will provide for a functional institutional and financial framework to respond to climate related shocks (droughts and floods) with the objective to assure food security. On the other hand, reforms aim at improving school autonomy and teachers' competence, recruitment systems, and effective deployment. The program also supports measures to overhaul the Technical and Vocational Education Training (TVET) governance systems especially for financing, training and curriculum. It also crowds-in the private sector to boost the relevance of the training offered and align it with labor market demands. These reforms are essential to improve the quality and relevance of skills provided by the national education system and as a result boost the competitiveness of the private sector and long-term productivity.

ACCOUNTABILITY MECHANISM OF WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. You can learn more about the Inspection Panel and how to file a complaint at: <https://www.inspectionpanel.org>.
