China Plastic Waste Reduction Project

Quick Facts

Countries	China
Specific Location	Chongqing, Ningbo
Financial Institutions	World Bank (WB)
Status	Approved
Bank Risk Rating	A
Voting Date	2021-06-24
Borrower	Government of the People's Republic of China
Sectors	Climate and Environment, Education and Health
Investment Type(s)	Loan
Investment Amount (USD)	\$ 430.00 million
Loan Amount (USD)	\$ 430.00 million
Project Cost (USD)	\$ 616.74 million

Project Description

As stated by the World Bank, the development objective of the Plastic Waste Reduction Project for China is to improve plastic waste management at the national and sub-national level, and to reduce plastics pollution from municipal solid waste. The project comprises of four components.

The first component, national policies and institution strengthening will support China develop forward-looking policy directions provisioned under the policy note of further strengthening plastic pollution control (January 2020), the guiding opinions on accelerating the development of a green and low-carbon circular economy (February 2021), in line with the new law on solid wastes (April 2020), and in alignment with China's 14th five-year plan.

The second component, sub national and local technical assistance and capacity building will help increase the synergy of the waste management regime at national, sub-national, and local levels in China, through better coordinated policy development and enforcement, pilots and demonstration, and institutional capacity building across administrative layers. It consists of following sub-components: (i) technical assistance (TA) and institutional capacity building; (ii) TA and capacity building for Chongqing to enhance urban solid waste management (SWM) from the onset of waste separation and strengthen solid waste management in rural and peri-urban areas aiming at reducing plastic waste pollution; and (iii) TA and capacity building for Ningbo to promote advanced waste recycling.

The third component, improvements to municipal solid waste management and plastic recycling will support Chongqing and Ningbo to improve the functionality of respective SWM systems, addressing plastic leakage hotspots in waste flows and pushing recycling to a higher level. It consists of following sub-components: (i) improvements to solid waste management systems in urban and rural Chongqing; and (ii) improvements to municipal solid waste management systems in Ningbo.

The fourth component, project management, monitoring and evaluation will support the operation of project management and implementing agencies in National Development and Reform Commission (NDRC), Chongqing and Ningbo, to ensure smooth project implementation and compliance to Bank and domestics policies and procedures.

Early Warning System Project Analysis

According to the World Bank, the project E&S risks are 'High'.

ACCESS TO INFORMATION

To submit an information request for project information, you will have to create an account to access the Access to Information request form. You can learn more about this process at: <https://www.worldbank.org/en/access-to-information/request-submission>

ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. Information on how to file a complaint and a complaint request form are available at: <https://www.inspectionpanel.org/how-to-file-complaint>
