## WB-P175645

Support to Economic Recovery and Job Creation in the Agri-Food Sector and Rural South

Countries	Tunisia
Financial Institutions	World Bank (WB)
Status	Approved
Bank Risk Rating	U
Voting Date	2021-02-22
Borrower	Government of Tunisia
Sectors	Agriculture and Forestry
Investment Type(s)	Advisory Services
Project Cost (USD)	\$ 1.23 million

#### **Project Description**

According o bank documens, the Project objective is to help restore and promote job creation in the agri-food sector in the targeted Governorates.

The project has three components:

- 1. Component 1 Technical assistance to POs and SMEs. The implementation of the proposed matching grant instrument will require technical assistance to POs and SMEs to prepare and select technically sound and financially and commercially viable investment projects. An implementing agency will deliver this technical assistance. It will disseminate information to potential PO and SME investors, including reaching out more specifically to youth and women entrepreneurs, and organize calls for proposals. This will include facilitating the dialogue with relevant authorities, private sector associations, and other stakeholders to ensure that the investment project submission are consistent with the understanding of the territory and the opportunities and constraints of the sector/segments. The implementing agency will help POs and SMEs develop technically sound and commercially viable business. It will ensure that investment project proposals submitted to TRACE Matching Grant have a strong potential to be profitable and sustainable to ensure business growth and create jobs, while improving producers' resilience and economic inclusion.
- 2. Component 2 Grants for agri-food and rural job creation. TRACE Matching Grant will provide non-reimbursable financial contributions (grants) to investment projects submitted by POs and SMEs engaged in agri-business activities ranging from production, processing to marketing with the objective to help business growth and job creation. Grants will be capped to 70% of the cost of the proposed investment project and will finance small-scale equipment and inputs, and soft activities (technical and managerial training and advice, marketing guidance and market intelligence, etc.). Eligible activities will cover the wide range of opportunities offered by the agri-food sector and agrirural entrepreneurship ranging from: farming production and processing, agri-service providers (input and technology supplies, advisory services, etc.), to post-harvest operations (storage, processing, packing, etc.). This will also cover the valorization of cultural and natural resources through handy craft and rural tourism.
- 3. Component 3 Project management and coordination. The Project will provide resources to the implementing agency (see information below) to properly deliver technical assistance and operate the matching grant, while meeting the Bank's fiduciary and safeguards requirements. The implementing agency will have to provide (technical and fiduciary) monitoring reports, will report progress against TRACE objectives and indicators, will be subject to regular fiduciary verification, annual audits and technical supervision. It will coordinate with other Government's operations and donorfunded projects, looking for cooperation and potential synergies. Implementation will also be closely coordinated with the other TRACE technical assistance activity managed by the Bank under the BETF on specific skills development such as smart agriculture, market intelligence, access to export markets, online/digital marketing, e-commerce, among others
