Project Description

According to the WB, the proposed operation is an Investment Project Financing (IPF) of US\$80.0 million to be implemented over a six-year period. The total project cost is estimated to be US\$100.0 million, including US\$20.0 million of counterpart funding from the State of Mato Grosso. The proposed project will contribute to increased market access and climate resilience of selected family farmers in Mato Grosso (component 1) and improve land and environmental management of selected family farmers in the State (component 2). This will be achieved through a mix of targeted technical assistance, tailored financial support to producer organizations (POs), and improved provision of public services. Project component 3 will support governance and project management, and project component 4 will be a Contingency Emergency Response Component (CERC).
