Mozambique Digital Acceleration Project

Quick Facts

Countries	Mozambique
Financial Institutions	World Bank (WB)
Status	Active
Bank Risk Rating	A
Voting Date	2022-07-15
Borrower	Government of Mozambique
Sectors	Infrastructure
Investment Type(s)	Grant
Investment Amount (USD)	$ 200.00 million
Project Cost (USD)	$ 200.00 million

Project Description

According to bank documents, the project objective is to increase digital adoption and inclusion, and to support the foundations for accelerated digital transformation.

The project has four components:

1. Component 1: Digital Access and Inclusion Component 1 aims to expand digital access and inclusion to ensure that all Mozambicans can benefit from the digital revolution – by (i) making Mozambique a more attractive and competitive place for digital investment, and (ii) expanding availability, affordability and uptake of digital services and technologies, particularly in rural areas, underserved communities and among disadvantaged groups. Interventions under this component will target both the supply side, through broadband market reforms in support of increased access and affordability as well as targeted investments to boost last-mile network coverage, and, in parallel, the demand side, through local access schemes to tackle the major barriers that hamper greater uptake and growing demand of digital tools and services.

    i. Subcomponent 1.1: Enabling environment for digital investment, inclusion and resilience This subcomponent aims to strengthen the enabling environment for the telecom/broadband market to drive

    competition, investment, service quality and affordability while strengthening climate resilience and mitigating the climate and environmental impact of digital infrastructure, services and devices.

    ii. Subcomponent 1.2: Rural digital connectivity and access. This subcomponent aims to address last mile broadband network infrastructure and services gaps in rural areas and among underserved and vulnerable communities.

    iii. Subcomponent 1.3: Digital inclusion initiatives. This subcomponent will aim to accelerate broadband uptake and increase participation and inclusion in the digital economy, by addressing demand-side barriers that hamper greater access to and demand for digital tools and services.

2. Component 2: Foundations for Accelerated Digital Transformation Component 2 aims to build the critical digital foundations for the government, economy and jobs of the future, including (i) spurring development of digital infrastructure, (ii) better utilization of data for policymaking and service delivery, (iii) improving trust and security of online transactions, sensitive data and infrastructure, and (iv) leveraging digital connectivity and technologies to improve learning outcomes and impart students with digital skills.

    i. Subcomponent 2.1: Core digital service infrastructure. This subcomponent will aim to increase the geographic reach, capacity, reliability, and security of GovNet to improve public administration and digital service delivery, while simultaneously using the government's purchasing power to spur private investment to develop a unified, robust, open access backbone infrastructure across the country

    ii. Subcomponent 2.2: Data governance, data protection and cybersecurity. This subcomponent will aim to (i) improve national data governance arrangements to ensure secure, cost-effective and sustainable data management practices, (ii) strengthen the Government cloud environment to enhance data hosting, accessibility, and integration capabilities, while stimulating development of the data infrastructure and cloud services market, and (iii) enhance cybersecurity

    iii. Subcomponent 2.3: Digital solutions for improved learning and digital skills development. Thissubcomponent will support digital transformation of the national education and higher education systems.

3. Component 3 Project Management, Institutional Coordination and Citizen Engagement. Component 3 will support project management and implementation functions and strengthen the GoM's coordination and management capacity. It will also

ACCESS TO INFORMATION

To submit an information request for project information, you will have to create an account to access the Access to Information request form. You can learn more about this process at: https://www.worldbank.org/en/access-to-information/request-submission

ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. Information on how to file a complaint and a complaint request form are available at: https://www.inspectionpanel.org/how-to-file-complaint
