MV: Digital Maldives for aDaptation, Decentralization and Diversification

Project Description

According to the World Bank project page, the objective of the proposed project is to enhance the enabling environment for the digital economy in Maldives, to improve government service delivery, and to leverage data and analytics for a green, resilient, and inclusive development.

The proposed Project aims to support Maldives' intentions to use digital technologies to decentralize, diversify and to adapt to climate change. It is designed around two components and the proposed activities are conceived following the country's priorities and funding needs in the medium term: (a) to develop the enabling environment for a digital economy; (b) to use digital technologies and shared data platforms to enhance and accelerate adaptation, economic diversification, and decentralization strategies and measures.
