Project Description

According to World Bank documents, the objective of this project is to "transform student learning and research in technical education in India with a focus on equity, resilience and governance in select states."

MERITE sets out to initiate a long-term agenda of systemic change in the technical education sector that envisions transforming the paradigm of tertiary education delivery in India. In accordance with global trends and the NEP, the vision is to develop a tertiary education system which effectively prepares students to become active citizens and specialists who address the key challenges of the future and develop the foundations of resilient, green and inclusive societies.
