Project Description

s stated by the World Bank, the project development objective is to increase solar electricity generation in Tajikistan through ivate investments. The Government of Tajikistan (GoT) has requested World Bank's and GIF's support in the implementation of y project within the national Generation Expansion Plan (GEP) of Tajikistan, which envisions around 1000 MW of solar PV as par the least-cost capacity plan developed for Tajikistan until 2040. In order to meet this target, GoT intends to launch a ocurement process to attract private investment to build the first new solar PV plant (200MWp) in the Sughd region, located in e northern part of the country where energy security is becoming a challenging issue. This project will support the GoT to ructure, design and develop a 200 MWp PV solar plant under a Public-Private Partnerships (PPP) scheme by recruiting a private artner, through an international competitive bidding process, to design, build, finance operate and maintain the solar PV. The W ngagement also includes a private capital mobilization component by providing a guarantee instrument to potential developers duce project's risks, costs and contribute to tariff affordability.
