Project Description

According to bank documents, the project objectives (PDO) is to increase access to improved water supply services; and to improve service delivery capacity in selected cities.

The project has three components:

Component 1 – Priority investments to secure water at the source (US$40 million equivalent). This component will focus on improving integrated water resource development and management to secure
water availability in both quantity and quality to meet the increasing urban demand in the Southern region.

Component 2 – Expansion of water supply infrastructure (US$60 million equivalent). This component will invest in the expansion of the water treatment and transport capacity to enable downstream utility-led investments in the distribution network to extend services.

Component 3 – Enhancement of operational sustainability and resilience of services (US$30 million equivalent). Building on the recommendations from the Water Supply and Sanitation Policies, Institutions and Regulations (PIR) and the Water Sector Public Expenditure Review (PER), under this component, the project will provide financial incentives to improve the sustainability and resilience of services.

ACCOUNTABILITY MECHANISM OF THE WORLD BANK

The World Bank Inspection Panel is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by a World Bank-financed project. If you submit a complaint to the Inspection Panel, they may investigate to assess whether the World Bank is following its own policies and procedures for preventing harm to people or the environment. You can contact the Inspection Panel or submit a complaint by emailing ipanel@worldbank.org. Information on how to file a complaint and a complaint request form are available at: https://www.inspectionpanel.org/how-to-file-complaint
